GLOBAL / GEOPOLITICS / CLIMATE

- Fed: Warsh transition, US rates spillover to ACGB beta

- ENSO: drought risk to food CPI and power demand

- Shipping routes, supply chains, defence spend pressure

COMMON BLIND SPOTS

1. Variable-rate mortgage stock makes RBA transmission faster than peers - cash-flow channel dominates 2. Monthly CPI indicator is partial; quarterly trimmed mean is the policy object 3. Energy shock is a positive terms-of-trade income shock AND a CPI shock - signs conflict across clusters 4. Semi (state) supply matters as much as ACGB supply for the curve 5. Migration swings can flip housing, labour and per-capita reads quickly
